

GREEN MONTESSORI

— PRESCHOOL | KINDERGARTEN | ELEMENTARY —

The education of
even a small child,
therefore, does not
aim at preparing him
for school, but for life.

Maria Montessori

ABOUT

GREEN MONTESSORI SCHOOL

The choice of how your child will be educated during their formative years is one of the most important decisions you will ever make regarding your child's future.

With that in mind, GMS carefully designed its program to be interesting, attractive, and, at the same time, accommodate the natural stages of children development.

GMS is currently the first and only Authentic Montessori School in Indonesia that integrates Islamic Values and Respect for Nature. GMS started its learning activities with only three students in 2011 on the second floor of a rented house in Mampang, South Jakarta.

With continued growth, GMS decided to move to its permanent facility in Duren Tiga in 2015. By 2018, GMS has served more than 250 families and has also been nationally accredited (Grade A) by the Education and Culture Ministry.

GMS strives to be a school that could provide a joyful and prepared holistic-learning environment for the students through Montessori Method of learning. The program also encourages children to spread Islam as *Rahmatan Lil Alamin* (blessing for the whole world and its content) by promoting peace and kindness to all His creations.

The school also engages its students with various environmental issues and encourages them to actively support Environmentally Sustainable Actions as part of our responsible toward nature.

GMS believes that a successful education only occurs when there is a strong partnership between parents and school. In GMS, we are committed to collaborate with you to provide a meaningful education for children of today and years to come- *Inshallah*.

pre-school & kindergarten

3 – 6 years old

GMS Pre & Kindy program was designed with the child, and only the child, in minds. We understand that children are curious by nature and always have the urge to explore and discover things around them. Realizing this, our Pre&K program is based on holistic development of a Whole Child and active exploration.

Each classroom is equipped with a complete set of beautiful Montessori apparatus, aiming to stimulate your children into exciting hands-on discovery.

Our learning environments feature both indoor and outdoor spaces with an inviting array of hands-on materials, books, plants, animals, arts and music, and nature activities.

SUBJECTS:

Islamic Studies

Practical Life

Sensorial Exploration

Physical Education

Literacy

Mathematics

Geography

Botany

Science

Music

Dance

Art and Craft

Following Montessori practices, our classroom consists of mixed-aged children to develop your children's social skills. Through the mixed-age group, students are exposed to social interaction, giving them the opportunity to learn about tolerance and appreciation for individual's differences, cooperation, respect for oneself and for others, which is a strong part of the Montessori curriculum.

The entire learning process runs under the watchful eyes of our dedicated teachers and staff team who are willing to go the extra mile to ensure your children's stages of development and growth are well nourished and cherished.

Spend some time to visit us and catch a glimpse of our school's dedications as an exciting discovery and learning place for your precious ones!

Our Elementary program has been acknowledged as one of the top-tier schools in Indonesia and has received grade A accreditation from the Education and Culture Ministry in 2018. Although GMS has been celebrated for its academic achievements, we genuinely believe that education is more than curriculum plans.

Montessori offers an exciting idea for guiding our Elementary education, "Our aim therefore is not merely to make the child understands, and still less to force him to memorize, but so to touch his imagination as to enthuse him to his innermost core" (To Educate the Human Potential, p.11).

With this in mind, in GMS, we designed our program to not only accommodate the holistic stages of development of a whole child, but also rekindle children's excitement in learning and exploring the world. Although the curriculum is broad, all the subjects are interwoven to inspire and provide clearer perspective about the world and things around them.
